Abstract

Method and system for paying for goods or services

The present invention relates to a method and to a system for paying for goods or services. It comprises a mobile radio device (3) and a base telecommunication station (1) which communicates with the mobile radio device (3) by means of electromagnetic waves. The base telecommunication station (1) transmits the data required for payment to the mobile radio device (3). The latter asks the user for confirmation for the payment. After the confirmation, the mobile radio device (3) performs a payment operation by transmitting payment instruction data. In addition, either the mobile radio device (3) or a telecommunication device (6) of a financial institution transmits acknowledgement data for the payment operation to the base telecommunication station (1).
